

Lab Exercise #9: Simple Contact Manager

1 Overview

For this lab, create a simple contact manager program.

Your program should

- Provide a menu that allows the user to select on of the following options.
 - Add contacts (store names in an array).
 - Display all contacts.
 - Search for a contact by name.
 - Exit the program.
- Write functions to accomplish these tasks. Use the function names given below.
 - `addContact`
 - `displayContacts`
 - `searchContact`
- Use an array of strings to store contact names (max 10 contacts each with a max of 50 characters).
- Use a loop to keep the menu running until the user selects exit.

2 Code Documentation

The very first lines in *all* of your programming project files this semester should be comments in the class header file (copy from header.c). Of course, the items in the square brackets [] in the comments should be filled in with the proper information.

In addition, the first output for all of your projects this semester, both for the lab exercises and the programming assignments, should be the name of the project and your name, e.g:

```
printf("Lab #9 - Joe Student\n");
```

Obviously, for the lab exercises, the output should include the names of both students in the lab group, e.g:

```
printf("Lab #9 - Joe Student and Jane Doe\n");
```

3 Sample Run

There was not room to show multiple contacts being added or to show a search. Be sure that your code works for those.

Your output should match the sample run below.

```
Lab #7 - Mark Schwitzerlett and Carl Friedrich Gauss

Simple Contact Manager
-----
1. Add Contact
2. Display Contacts
3. Search Contact
4. Exit

Choose an option: 1

Enter contact name: Bob Jones

Contact added!

Simple Contact Manager
-----
1. Add Contact
2. Display Contacts
3. Search Contact
4. Exit

Choose an option: 2

Contacts:
1. Bob Jones

Simple Contact Manager
-----
1. Add Contact
2. Display Contacts
3. Search Contact
4. Exit

Choose an option: 4

Exiting program...

...Program finished with exit code 0
Press ENTER to exit console.
```

4 Deliverables

You should turn in a stand-alone, complete application program (your C source code, a single “.c” file) containing a `main()` function. All labs and projects this semester will be submitted in Gradescope (via a Canvas assignment).

Your file should be named Lab#6_FirstName_LastName.c

Due date: The lab is due at the end of your lab period, either October 28th or Thursday, October 30th.

Be sure to save a copy of your .c file.
